**Connect IT.**

1. **Your Identity**
   Manage your MyUNL ID.

   - To register for wireless in the residence halls and access most online services, you'll need to know your MyUNL (Blackboard) ID and password.

   - Don’t lose your MyUNL ID. Get a stick-on label for your computer if it’s already connected and go to myred.unl.edu (under the ‘Student’ tab) and look up your username and id.unl.edu (where you can reset your password).

2. **Password Guidelines**
   - Never share your password.
   - Treat your password like your credit card number.
   - Don’t use the same password on multiple sites.
   - Don’t know your MyUNL ID?
   - Change your password often.
   - Use a password of at least eight characters and try using a passphrase in your password.

   - Log in using your My.UNL (Blackboard) ID and password.

   - Open a web browser (preferably Chrome, Firefox or Safari). You should be directed to the Unl-Login button and login with your MyUNL credentials.

3. **Computers on SafeConnect**
   Protecting your computer on Residence Hall Network.

   - ResNet is using the SafeConnect Registration System. General information about SafeConnect is available at http://its.unl.edu/safeconnect/.

   - To register for wireless in the residence halls, and access most online services, you’ll need to know your MyUNL (Blackboard) ID and password.

   - Once you connect to UNL-AIR, proceed to Step 3.

4. **Improving Connections**
   Tips for improved performance in Residence Halls.

   - Because students use multiple devices, plug-in all ethernet-enabled devices like laptops and gaming consoles. This leaves more bandwidth available for mobile devices.
   - To activate ethernet jacks for your room, login into MyRed and fill out a maintenance request under ‘Facility Housing portal’.
   - After connecting your computer to UNL-AIR, go to http://secure-it.unl.edu/
   - Highly recommended: After connecting your computer on UNL-AIR, go to http://secure-it.unl.edu/ and use the automated system there to configure your computer to use the encrypted wireless network, UNL-AIR-EC.

   - Highly recommended: After connecting your computer on UNL-AIR, go to http://secure-it.unl.edu/ and use the automated system there to configure your computer to use the encrypted wireless network, UNL-AIR-EC.

   - Use ethernet on all devices that can be plugged in.

   - No routers/switches/hubs via a USB connection.
